## (Control Region 1) Two OS $\tau_h \tau_h$ with both legs passing medium isolation. Low $M_{T2}$ or $\Sigma m_T^{\tau_i}$

## Two OS $\tau_h \tau_h$ with both legs

passing medium isolation. High  $M_{T2}$  or  $\Sigma m_T^{\tau_i}$ 

(Signal Region)

## (Control Region 2)

Two SS  $\tau_h \tau_h$ , one leg loose

(Control Region 3) Two SS  $\tau_h \tau_h$ , one leg loose non medium isolation and one leg loose isolation. High  $M_{T2}$  or  $\Sigma m_T^{\tau_i}$ 

 $M_{T2}$  or  $\Sigma m_T^{\tau_i}$ 

non medium isolation and one leg loose isolation. Low  $M_{T2}$  or  $\Sigma m_T^{\tau_i}$
